### What happened on the first visit

The Local Offer team went to Cromer Junior School in November 2017

We met with children and young people and looked at the new Local Offer for children and young people website.

We asked the children and young people to look at:

- Are we using the right pictures?
- Are we using words that they understand?
could they find information on the website we asked them to find

The Local Offer team got lots of useful information, which we used to make changes to the website.

What happened when we went back

We went back to Cromer Junior School in February 2018

And showed the children and young people the changes to the website

The children and young people told us they like:
"I like the money section. I just like money and think it's important"

"I like the health and the money. They are really important. I would give money to the poor people to help them to be healthy."

The children and young people told us they do not like:

My home – the image should be changed on the front of the button

What else did they say they wanted to know about

"some of the conditions people can have, so people can have help to understand different conditions and what makes it difficult for them"
| videos about different types of homes – flats, houses, caravan, boat, house with garage. Also inside homes to show how different homes are adapted for people with disabilities and technology that can help in the home (pens that read labels) |
| safety – hot safety, cold safety, trusted traders, roads, strangers, online, scam phone calls, scam emails, sexting |
