Broken bridge on footpath FP9/FP10 at Burnham Thorpe - temporarily closed to pedestrians until further notice.

Following a recent routine inspection of the pedestrian timber footbridge on Public Right of Way (PROW) route ‘Burnham Thorpe-FP9/FP10’ we identified structural timbers that are rotten which means that we have to temporarily close the bridge as it is unsafe to use.

Until repairs can be carried out to the bridge, the route can still be used on a ‘to the bridge and back’ basis only. Please see attached map showing the location of the closed bridge, and the footpath route available.

The County Council thanks people for their patience during this necessary bridge closure.
