Bridge on bridleway at Tharston - temporarily closed to equestrians and pedestrians

A recent routine inspection of the bridge on ‘Bridleway Tharston BR16’ has identified damage to structural timbers, making it currently unsafe for equestrian and pedestrian use.

This means that the bridge must be closed for safety reasons, and the route can only be used on a ‘to-the-bridge and back’ basis. This restriction is temporary until suitable repairs to the bridge can be made. Repairs will be made as soon as possible however unfortunately, we currently do not have a date for when these repairs can be carried out as it is subject to available budget and resources.

The County Council thanks people for their patience and apologise for any inconvenience.
