For immediate release

24 December 2019

Road Closure of the C33 Ryston Road, West Dereham for Bridge Emergency Repair Works

Following a report of damage to the culvert on Ryston Road, West Dereham, it has become necessary to close the road over the culvert to all vehicular traffic until repair works can be carried out early in the new year. We believe recent high water flow and levels have caused the upstream headwall to detach from the culvert resulting in a deep hole in the verge.

The County Council thanks people for their patience while these bridge maintenance works are being carried out.
