

Report title:	Improving Outcomes for People Affected by Cancer in Norfolk and Waveney: Early Cancer Diagnosis and Prevention
Date of meeting:	30 October 2019
Sponsor (H&WB member):	Patricia Hewitt, STP Independent Chair Melanie Craig, STP Executive Lead
<p>Reason for the Report There are objectives laid out in the NHS Long Term Plan and National Cancer Strategy to improve prevention, earlier diagnosis and survival from cancer. Although cancer outcomes are improving there is still a significant gap with the best in the EU. Mortality rates from cancer are significant for Norfolk and Waveney.</p> <p>Report summary The presentation will set-out:</p> <ol style="list-style-type: none"> 1. Why early cancer diagnosis and cancer prevention are important 2. What we are doing to address this 3. How the Health and Wellbeing Board members can help <p>Recommendations The HWB is asked to:</p> <ol style="list-style-type: none"> a) Support the whole system approach to cancer prevention and early diagnosis set-out in the presentation and summarised in the plan on a page below. b) Align commissioning intentions across systems to contractually support this work. c) Strengthen existing collaborations and partnerships, including whole system processes for data sharing and information governance, and the rapid appraisal and early adoption of innovations. 	

1. Background

- 1.1 This is the first presentation to the Board about early cancer diagnosis and prevention from the STP Cancer Transformation Programme. This work is part of a wider regional and national agenda to address the recommendations from the NHS Long Term Plan (LTP) and the National Strategy for Cancer.
- 1.2 The national LTP ambitions for cancer are that:
 - By 2028 more people will survive five years following a diagnosis of cancer.
 - More people will be diagnosed at any early stage of cancer (stage 1 or 2).

2. Introduction

- 2.1 Why are early cancer diagnosis and cancer prevention important? In Norfolk and Waveney cancer causes about 25% of deaths in females and 30% of deaths in males – this is over 3,200 deaths per year. Cancer Research UK statistics show that 1 in 2 people born after 1960 in the UK will be diagnosed with some form of cancer during their lifetime.
- 2.2 42% of cancers in the UK are preventable.
- 2.3 What are we currently doing about it and what are our future plans? We have a programme of work which includes the following:

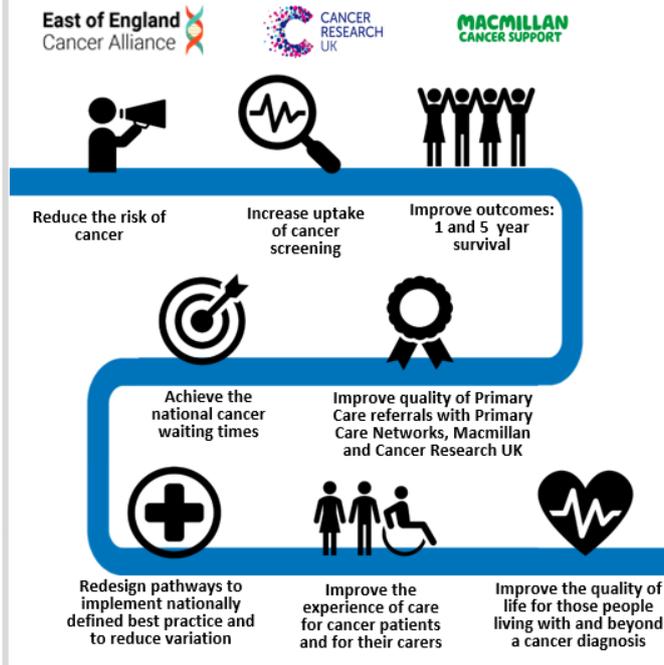

Our Vision

-  Cancer care available to all in our system
-  Improved cancer care with earlier diagnosis
-  Excellent support during and post treatment
-  The ability for patients to access services to support them
-  Great patient experience

National Strategy

- Improve Survival
- Improve Access to Screening
- Earlier/Faster Diagnosis
- Better Treatment & Personalised Care
- Sustainable Workforce
- Improve Patient Experience
- Address Health Inequalities

Local Approach

Our Delivery:
Short Term Deliverables

- Improve 1 year survival rate
- Meet 62 day waiting time target (85%) for all cancers
- Meet 2 week GP to consultant waiting times for all cancers
- Improve screening uptake
- Provide more personalised care

Longer Term Deliverables

- Cancer diagnosis or ruled out within 28 days by 2021
- Increase the number of people diagnosed at stage 1 or 2 to 75% by 2028
- Fast track local implementation of new innovations and technologies
- Design new service models of care that meet the need of the increasing number of people living with and beyond cancer

3. Recommendations

3.1 The HWB is asked to:

- a) Support the whole system approach to cancer prevention and early diagnosis set-out in the presentation and summarised in the plan on a page above.
- b) Align commissioning intentions across systems to contractually support this work.
- c) Strengthen existing collaborations and partnerships, including whole system processes for data sharing and information governance, and the rapid appraisal and early adoption of innovations.
