Dear Sir/Madam,

**Norfolk Minerals Site Specific Allocations Development Plan Document (DPD):  
Single Issue Review of Silica Sand – Preferred Options Consultation Document**

I am writing to inform you that the Preferred Options Consultation on the Single Issue Silica Sand Review of the Norfolk Minerals Site Specific Allocations Plan will take place over a six week period from **6 November to 21 December 2015** (inclusive), and I would welcome your comments.

The Minerals Site Specific Allocations Plan (adopted by full Council on 28/10/2013) contains a requirement for a Silica Sand Review of the Plan to be completed by 2016. The review is needed to address the predicted shortfall, of 2.5 million tonnes, in the quantity of silica sand extraction sites allocated in the Plan. It is predicted that around 750,000 tonnes of silica sand will be extracted from Norfolk per annum. It is expected that no more than one or two additional specific sites will need to be allocated over the plan period (to 2026) to meet the shortfall.

The Silica Sand resource in Norfolk occurs entirely within the administrative boundary of the Borough Council of King's Lynn and West Norfolk.

Following an Initial Consultation on the Silica Sand Review, and a 'call for sites', earlier in 2015, the next stage in the process is the Preferred Options Consultation.

The Preferred Options consultation document contains one specific site for silica sand extraction and ten areas of search (AoS) which have been defined by planning officers. Areas of search are large areas within which permission for silica sand extraction may be granted on a smaller area of land. The Preferred Options document contains an explanation of how the ten areas of search have been defined and an assessment of the specific site and each of the areas of search. We would welcome your comments on the suitability of the specific site and ten areas of search for future silica sand extraction.
