This document is issued for the party which commissioned it and for specific purposes connected with the above-captioned project only. It should not be relied upon by any other party or used for any other purpose.

We accept no responsibility for the consequences of this document being relied upon by any other party, or being used for any other purpose, or containing any error or omission which is due to an error or omission in data supplied to us by other parties.

MM filing ref: 233906EN/BSE/NOR/031

This document is submitted in relation to the application for a proposed development by Norfolk County Council to the Planning Inspectorate, under the Planning Act 2008.

The application is for the Norfolk County Council (Norwich Northern Distributor Road (A1067 to A47(T))) Order, to grant development consent for the construction of a new highway running west-east between the A1067 Fakenham Road and the A47 Trunk Road at Postwick, including improvements to the existing highway network to the north and north east of Norwich.

This document comprises part of the application documents and relates to Regulation 5(2)(q) of the Infrastructure Planning (Applications: Prescribed Forms and Procedure) Regulations 2009.

Table of Contents

1. Introduction	5
2. Procedure	6
3. Photographs and Photomontages.....	7

1. Introduction

Representative views of the Scheme have been prepared from nine specific locations. The images show the existing view and representations one year and fifteen years after construction of the proposed Scheme.

PAGE NOT USED

2. Procedure

The model used for photomontages was created using a combination of MX Roads design data provided by Norfolk County Council, topographical survey and Digital Terrain Model data.

The model was built using 3D Studio Max 2012, rendered using V-Ray and post processed using Photoshop CS5.

2.1 Photography Procedure

Photographs were taken using a 21 megapixel digital single lens reflex camera with a 50mm lens and a full frame sensor. Photographs were taken at 15 degree intervals for full 360 degrees and combined into a panoramic photo. The photo was then cropped to show only the area of interest.

Surveyors recorded relevant co-ordinates surrounding the camera location and a nail beneath the camera. A measurement was taken between the nail and the camera lens to determine the Eye height.

3. Photographs and Photomontages

See Section 7.2 for Plans Identifying Locations and Directions of Photomontages.
See Section 7.3 for Index of Photographs.
