Risk Allowance

Project: Norwich Western Link

Date: May 2021

The total risk allowance comprises the following elements:

Total Risk Allowance	£39,934,004
Increased Fees over and above the forecast Fee provision	£1,475,948
Inflationary risk associated with the above	£4,128,825
Quantified risk (see Quantified Risk Register)	£34,329,231

Norfolk County Council - NWL Risk Register - Quantitative

Bidder/Contract						Opening	Risk Assessment]		С	urrent St	tatus			Mitig	ated Risk Assessme	ent:]
Risk A Category	Risk B Category	QRA Ref	Date added	Risk Description (lack of, failure to)	Impact of Risk	Likelihood	e Risk Level	Risk Mitigation Measures	Mitigation Progress	Likelihood	Risk Score	Risk Level	Likelihood	Risk Fe	Probability	Minimum £15,294,930	Most Likely £34,329,231	Maximum £65,938,682	Target Resolution Date
Strategic	A - Funding / Third parties	<u>A04</u>	18/06/2018	There may be a delay in the funding approval (OBC) from DfT due to a general election being called or other factors impacting the sign off of the business cases.	Delay to scheme development. Programme delay.	3 4	12 MEDIUM	1. Ensure scheme is high on the political agenda. 2. Council and Business Rate Pool grants funding the scheme so far. 3. Programme to be revised with new anticipated funding announcement date 4. Engagement with DfT to reinforce the need for the scheme	Conditional approval and entry into the LLM funding programme has been confirmed by DfT. OBC being developed for submission to DfT.	3 1	3	LOW	2 1	2 LOV	13.00%	£56,484	£112,968	£338,905	31/07/2021
Strategic	A - Funding / Third parties	<u>A05</u>	18/06/2018	The project may receive a legal challenge based on the planning and environmental processes followed, or if environment factors are encountered during surveys	Delay to programme and the associated costs of tackling a legal challenge Prolonged public inquiry Judicial review of the scheme	4 5	20 HIGH	1. Keep stakeholders appraised of progress and engaged with the project. Treat all stakeholders fairly and equitably. Stakeholder management plan. 2. Continue to build robust evidence base and ensure all scheme benefits are identified, following webTAG guidance. 3. Provision of a Robust EAST process. Audit trail and evidence base supporting business case. Legal review and guidance at key milestones - vulnerability assessment	Dialogue with key stakeholders including potential objectors ongoing. Communications of steps the Council is taking to alleviate concerns on certain issues e.g. environment. 2015 Traffic model has been updated for OBC to 2019. This updated model will be used for the completion of statutory process.	4 2	8	MEDIUM	3 2	6 MEDIU	M 35.50%	£157,161	£314,323	£471,484	31/08/2022
Strategic	A - Funding / Third parties	<u>A06</u>	18/06/2018	The value of the land required for the project may increase above the anticipated costs (inflation or otherwise)	Cost increase. Delays whilst land value negotiations take place.	3 3	9 MEDIUM	Ensure the estimate costs are refreshed at all stages and based on historic costs.	Landowner contact and liaison undertaken as part of shortlist consultation and is ongoing. Land cost estimate will be updated for the OBC	3 1	. 3	LOW	3 1	3 LOV	35.50%	£133,719	£267,439	£534,878	31/08/2022
Strategic	A - Funding / Third parties	<u>A08</u>	18/07/2018	The project may fail to secure budget for scheme funding profile from NCC and DfT due to changes in policy, change in MP support, or change in local support	Delays to programme (risk to overall delivery due to delay / delivery confidence). Delays issue of the notice to proceed to Stage Two and Stage Three.	4 5	20 HIGH	1. Demonstrate need for scheme so that buy-in and funding is secured. 2. Identify and track bid opportunities inclusion for local funding. 3. Consider opportunities for developer funding. 4. Demonstrate lessons from previous schemes and proven track record of delivery.	NWL has been identified as a regional priority scheme by Transport East in July 2019. Conditional approval and LLM programme entry has been confirmed by DfT. Engagement with finance stakeholders ongoing.	2 1	2	LOW	2 1	2 LOV	13.00%	£57,552	£115,104	£172,656	31/08/2022
Strategic	A - Funding / Third parties	<u>A10</u>	18/07/2018	Changes to UK relationship with the European Union affecting trading conditions.	Reduced willingness for expertise in EU to tender for project. Price increase in construction materials due to the value of the pound decreasing	3 3	9 MEDIUM	External political uncertainty - difficult to gauge at this stage. Monitor situation and consider financial / programme / procurement of any changes in relationship. Estimates will be calculated in a rigorous manner taking into account inflation along with a realistic delivery programme. Consider alternative materials/construction methods.		2 1	2	LOW	2 1	2 LOV	13.00%	£69,556	£139,112	£278,224	31/12/2022
Strategic	A - Funding / Third parties	<u>A13</u>	17/01/2020	Reduction or increase in the permanent land requirements over that shown on reference design drawings. Note: Contemplates changes from land requirements considered for the reference design by comparison to the tender design Risk C16 considers risk associated with change from tender design requirements.	Reduced and/or increased cost to acquire land required for the project.	1 1	1 LOW	Permanent land requirements to be discussed with bidders during dialogue, objective is to: 1. Reduce the permanent land requirements, 2. Minimise future maintenance liabilities for retained and 3. Reduce the over-all cost burden.	Site boundary to be established to permit optimal solution for earthworks and carriageway construction, with a balanced earthworks model either side of the River Wensum which will inform the temporary and permanent land requirements. Tender designs indicate minor changes to the reference design boundary lines.	4 1	4	LOW	4 1	4 LOV	65.50%	-£74,159	-£18,032	£84,698	30/04/2021
Strategic	A - Funding / Third parties	<u>A14</u>	17/01/2020	Reduction or increase in the temporary land requirements over that shown on reference design drawings. Note: Contemplates changes from land requirements considered for the reference design by comparison to the tender design Risk C17 considers risk associated with change from tender design requirements.	Reduced and/or increased compensatory payments for temporary land required for the project.	1 1	1 LOW	Temporary land requirements to be discussed with bidders during dialogue, objective is to: 1. Reduce the temporary land requirements, 2. Provide sufficient land to remove constraints that may preclude efficient solutions being considered/designed, 3. Minimise future maintenance liabilities for retained and 4. Reduce the over-all cost burden.	Site boundary to be established to permit optimal solution for earthworks and carriageway construction, with a balanced earthworks model either side of the River Wensum which will inform the temporary and permanent land requirements. Tender designs indicate minor changes to the reference design boundary lines.	4 1	4	LOW	4 1	4 LOV	65.50%	-£9,499	£55,211	£157,025	30/04/2021
Operational	A - Funding / Third parties	<u>A16</u>	17/01/2020	Reinstatement of temporary land occupied to deliver the project is not acceptable to landowners, as reinstatement fails to meet the standard recorded prior to temporary occupation.	Additional cost to reinstate to original condition or to acquire land.	1 1	1 LOW	Earthworks strategy to ensure suitable materials are retained to reinstate temporary land requirements back to their original condition, i.e. suitable quality and volume of topsoil, subsoils, etc.		1 1	1	LOW	2 1	2 LOV	13.00%	£45,102	£90,205	£180,410	20/03/2025
Operational	A - Funding / Third parties	<u>A17</u>	28/01/2021	Addition of new Third Party Agreements or amendment to the existing Third Party Agreements included in the Scope introduces additional or varied constraints.	Additional costs and programme implications.	3 1	3 LOW	Early negotiation and conclusion of TPA's Ensure TPA's do not impose additional constraints which will effect the way the Contractor provides the works.	Discussion with landowners and other stakeholders on-going.	2 1	. 2	LOW	2 1	2 LOV	13.00%	£39,273	£78,547	£157,093	30/06/2021
Strategic	B - Programme / Contract	<u>B03</u>	18/06/2018	Legal work may not completed on time.	Delays to statutory notifications required under planning consent requirements. Reputational damage due to loss of confidence in NCC's capability to deliver	3 3	9 MEDIUM	Engage early with NCC legal team and understand timescale - input to delivery programme, lessons learned from NDR	Same NDR team involved in NWL project. Regular meetings being held and programme shared. Pinsent Masons appointed to progress legal works.	2 1	2	LOW	2 1	2 LOV	13.00%	£54,715	£139,865	£398,209	31/08/2022
Strategic	B - Programme / Contract	<u>804</u>	18/06/2018	The planning process may impose unexpected conditions on the project.	Costs to address the conditions to allow licences to be released. This could include design updates, more land purchase Compression of the programme between the determination of planning and start of works	5 3	15 MEDIUM	Work with LPAs from early stage Consider requirements and lessons learnt from other projects including Broadland Northway.	It has been determined that the scheme will follow the Town and Country planning process. Engagement with the LPA and consultees ongoing.	3 3	9	MEDIUM	3 3	9 MEDIU	M 35.50%	£460,182	£920,364	£1,840,729	31/08/2022
Strategic	B - Programme / Contract	<u>805</u>	18/06/2018	The A47 dualling construction programme may change.	Delays to construction programme Cost impact to re-sequence work	3 4	12 MEDIUM	Work with Highways England and understand delivery programme for A47 and key interfaces, programme phasing to minimise impact e.g. southern section for later delivery.	Liaison commenced with Highways England and discussions / coordination ongoing. HE delivery plan recently published suggests a start of construction is now Q4 in 2022/23. The DCO was submitted in March 2021	3 3	9	MEDIUM	3 1	3 LOV	35.50%	£28,520	£85,560	£171,121	30/03/2022
Strategic	B - Programme / Contract	<u>806</u>	18/06/2018	Landowners may object to the scheme or to selling their land.	Potential delays or difficulties negotiating during the CPO process. Cost increase to agree a route and mitigation which impacts the BCR. Reputational damage for NCC with local landowners Change of landowner leads to disagreement on proposals	4 4	16 MEDIUM	Work in consultation with landowners from an early stage and use of statutory powers. Delivery programme to allow for inquiry timescales	Landowner meetings / discussions undertaken as part of options consultation and further liaison following the preferred route announcement. Discussions ongoing around the scheme design, including environmental mitigation.	3 1	. 3	LOW	2 1	2 LOV	13.00%	£28,242	£56,484	£227,373	31/08/2022
Strategic	B - Programme / Contract	<u>B12</u>	02/07/2018	NCC Decisions may not be made in a timely manner due to change of staff, loss of decision making personnel or absence of decision making personnel.	Delay to programme while decisions aren't made	2 3	6 MEDIUM	Programme to include key committee dates and milestones - deliverables to be ready in time for review to aid decision making, member steering group to keep members appraised.	Member group and Project Board meetings occur regularly. Council Cabinet generally meets monthly, although this may be impacted by Covid-19.	2 3	6	MEDIUM	2 1	2 LOW	13.00%	£29,620	£59,240	£118,480	31/03/2025
Strategic	B - Programme / Contract	<u>B17</u>	30/03/2020	Stage One - Pandemic - virus strain known as severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) or the disease known as coronavirus disease 2019 (COVID-19) (Including, in both instances any mutation or variant thereof) preventing external meetings being held with stakeholders and public consultation activities from proceeding.	Delay to programme	3 3	9 MEDIUM	Online meetings to be held where possible and further exchange of information electronically. Re-programme liaison groups and public consultations	Meetings and consultation events taking place online.	3 3	9	MEDIUM	4 1	4 LOV	65.50%	£50,174	£118,960	£237,920	07/07/2023
Strategic	B - Programme / Contract	<u>B18</u>	12/06/2020	The programme for adoption of the GNLP and LTP are delayed	The NWL programme does not align with the plan making process Reference to these policies would need to consider their stage in development	4 3	12 MEDIUM	Engagement with the GNLP, LTP team and Counsel to understand the programme for inclusion of the NWL.	Engagement with the GNLP, LTP and Counsel ongoing. GNLP programme has been brought forward by the GNGB. TfNS programme is under review	4 3	12	MEDIUM	1 1	1 LOV	2.50%				03/02/2022

Risk A Category	y Risk B Category	QRA Ref	Date added	Risk Description (lack of, failure to)	Impact of Risk	Likelihood	Risk Score	Risk Mitigation Measures	Mitigation Progress	Likelihood	Risk Score	Risk Level	Likelihood	Risk P	Probability	Minimum £15,294,930	Most Likely	Maximum £65.938.682	Target Resolution Date
Strategic	B - Programme / Contract	<u>B19</u>	16/09/2020	Procurement period - Pandemic - virus strain known as severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) or the disease known as coronavirus disease 2019 (COVID-19) (including, in both instances any mutation or variant thereof).	Delays to the programme and/or increased cost: 1. Staff availability - infections/self-isolation, 2. Reliance on technologies (resilience), 3. Sufficiency of programme and tender deliverables and 4. Increased inflationary pressues due to delay/prolongation.	4 3	12 MED	Compliance with guidance. Allow adequate time in the programme for probable effects.	Complying with guidance. Programme through to award of contract has been refined risk to the procurment programme will pass by 25/06/2021 on the assumption that the tender evaluation and decision making process which follows receipt of tenders is not impacted. The procurment phases has been extended with award of contract being deferred until local elections have been concluded on-going compliance with guidance and restrictions.	2 2	2 4	LOW	2 1	2 LOV	/ 13.009		£34,329,231	£90,235	30/06/2021
Operational	B - Programme / Contract	<u>B20</u>	16/09/2020	Stage One - Pandemic - virus strain known as severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) or the disease known as coronavirus disease 2019 (COVID-19) (including, in both instances any mutation or variant thereof) impacts the Client's and Contractor's resource.	Delays to the programme and/or increased cost: 1. Staff availability - infections/self-isolation, 2. Reliance on technologies (resilience), 3. Sufficiency of programme and Stage One deliverables, 4. Local and/or national lockdowns preventing the Contractor obtaining further SI/Gi data, 5. Prolonged surveys and or investigations, 6. Consultations and/or inquiry prolonged and 7. Increased inflationary pressures due to delay/prolongation.	3 3	9 MED	1. Compliance with guidance. 2. Contractor's risk under the contract, unless events directly associated with the pandemic prevent the Contractor's from completing the whole of the works by the planned Completion date or stop the work in totality clause 19. 3. Client risk if laws change by comparison to the las known at the contract date.	Subject to the start of Stage One. Programme amended with the starting date for Stage One Work being 25/06/2021. Delay to the award of contract would effect the Contractor's risk assessment associated with COVID-19, as COVID-19 is a Contractor's liability in Stage One, but as Stage One is a Lump Sum, the Contractor would retain the benefit. The delayed award would effect the retained Client risk as the vaccination programme being rolled out accrost he nation would reduce the probable effects, conversely the increased number of variants could have an adverse effect.	a 3 :	1 3	LOW	3 1	3 LOV	35.509	6 £59,373	£140,769	£281,539	07/07/2023
Operational	B - Programme / Contract	<u>B21</u>	16/09/2020	Stage Two - Pandemic - virus strain known as severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) or the disease known as coronavirus disease 2019 (COVID-19) (including, in both instances any mutation or variant thereof).	Delays to the programme and/or increased cost: 1. Staff availability - infections/self-isolation, 2. Reliance on technologies (resilience), 3. Sufficiency of programme and Stage One deliverables, 4. Local and/or national lockdowns preventing the Contractor obtaining further SI/GI data, 5. Prolonged surveys and or investigations, 6. Consultations and/or inquiry prolonged and 7. Increased inflationary pressures due to delay/prolongation.	2 3	6 MED	1. Compliance with guidance - Construction Leadership Councils Site Operating Procedures to be introduced. 2. Client risk if events directly associated with the pandemic prevent the Contractor from completing the whole of the works by the planned Completion date or stop the work in totality or laws change by comparison to the las known at the contract date. 3. Shared risk under the contract if the PWDD exceeds the total of the Prices, prior to the PWDD exceeding the total of the Prices prior to the PWDD exceeding the total of the Prices the risk is retained by the Contractor.	in Stage Two but it would effect the retained Client risk when considerring the vaccination programme being rolled out across the nation, conversely the increased	2 :	2 4	LOW	2 2	4 LOV	/ 13.009	6 £190,809	£381,799	£763,598	03/10/2025
Operational	B - Programme / Contract	<u>B22</u>	16/09/2020	Inflationary factors impacted by: 1) Increased natioanl infrastructure delivery programme, 2) Pandemic - virus strain known as severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) or the disease known as coronavirus disease 2019 (COVID-19) (including, in both instances any mutation or variant thereof) and 3) Brexit.	Inflation in excess of historic trends used for the purpose of the forecast, driven by: 1) Supply and demand 2) Increases in aggregate tax, fuel levies, road tax, landfill tax, etc.	3 3	9 MED	Oustide of the Client's and Contractor's control can only monitor. Contractor risk under the contract other than recovery through XI. Shared risk under the contract if the PWDD exceeds the total of the Prices, prior to the PWDD exceeding the total of the Prices the risk is retained by the Contractor.	Monitor situation.	3	3 9	MEDIUM	3 3	9 MEDI	JM 35.509	5 £910,738	£1,821,476	£3,642,951	07/07/2023
Strategic	B - Programme / Contract	<u>B23</u>	29/03/2021	The delivery of the Sustainable Transport Strategy is outside of the main D&B contract	Late changes to the D&B Contractors scope of work Potential programme implications subject to STS delivery timescales	3 3	9 MED	Work with other departments in NCC to determine the best delivery route for the ST Once confirmed, ensure the work is included in the forward plan.	S. Work ongoing to determine delivery route	3 3	3 9	MEDIUM	3 3	9 MEDI	JM 35.509	í.			20/03/2025
Strategic	B - Programme / Contract	<u>B24</u>	05/03/2021	Award of contract delayed from 01/04/2021 to 25/06/2021.	Programme delay resulting in additional costs.	5 3	15 MED	Programme review to consider mitigation to minimise or eliminate the effects on Stage Two. Carry out activities at risk.	Programme under review to identify mitigation measures.	5	3 15	MEDIUM	5 3	15 MEDI	JM 90.009	£319,688	£639,376	£1,278,752	25/06/2021
Strategic	B - Programme / Contract	<u>B25</u>	14/05/2021	Ecological mitigation work programme to be undertaken prior to the starting date for Stage Two cannot be delivered as programmed.	Delay.	1 1	1 LO	,		4	2 8	MEDIUM	4 2	8 MEDI	JM 65.509	£487,333	£1,461,998	£2,923,996	08/02/2023
Strategic	C - Scope Change / Change	<u>C01</u>	18/06/2018	Early assumptions made for engineering design found to be insufficient following receipt of further information. Note: Risk considers the adequacy of the Tender Design where the engineering solution deviates from the Reference Design (accepted deviations).	Design changes required, Cost increases during design due to increased design requirements (more concrete, greater level of excavation etc) Reputational damage Delivery delays	3 4	12 MED	Undertake sensitivity testing on key design parameters and assumptions. Consider robust/resilient case. Carry out desk study, ground investigation and topographical survey	Requirements for piling foundation, depth, diameter are currently based on available information including historical boreholes. Conservative design has been shown on the drawings at this stage and refined later during detailed design once ground investigation works are completed and Geotechnical Design Report is produced.	2 :	2 4	LOW	2 2	4 LOV	/ 13.009	6 £125,986	£271,278	£523,250	30/06/2021
Strategic	C - Scope Change / Change	<u>C03</u>	18/06/2018	Highways England may change the A47 junction design, requiring an update to the NWL alignment.	Additional cost, in both design and construction Delay to the design programme Increased land take Increased land costs Significant change may require additional environmental surveys Change in scheme design may have an increased environmental impact	4 3	12 MED	Regular co-ordination with HE to ensure that the NWL aligns and ties in with the A47 scheme.	Highways England have submitted the A47 North Tuddenham to Easton DCO application. The NWL ties in the with current HE junction layout and co-ordination will continue through design development.	1 2 :	1 2	LOW	2 1	2 LOV	/ 13.009	6 £67,643	£135,287	£270,574	31/12/2021
Strategic	C - Scope Change / Change	<u>C05</u>	18/06/2018	DfT standard departures may not be approved without changes or adjustments. Note: Risk considers the transition from NCC/Contractor design to Hi design at interface with A47.	Redesign to meet the standards at the tie in point with the A47 (Contractor design at/to the tie will need HE approval (transition)). Increased costs to overall scheme to meet acceptable standards. Delays while negotiating the departures.	2 3	6 MED	Design the interface with HE network at the A47 and the NWL approach to DMRB standards. Confirm the impact of DfT's updates to DMRB standards on the previous outline designs. Carry out preliminary designs to meet requirements of DMRB/national standards wherever possible - and minimise need for Departures.	Co-ordination with Highways England ongoing in relation to the design at the interface between the two projects. Statement of Common Ground being developed with Highways England.	1	1 1	LOW	1 1	1 LOV	2.50%	£13,008	£26,017	£52,033	31/12/2021
Strategic	C - Scope Change / Change	<u>C06</u>	18/06/2018	There may be a variation between actual site conditions and assumptions used in design, such as the GI and topographical survey	Ground works costs increase Land take may increase, The drainage design may need revision	3 4	12 MED	Intrusive ground investigation surveys to be undertaken sufficiently soon in programme (including ground water monitoring and infiltration testing). Ensure surveys are robust to minimise unknown changes in conditions	Preliminary ground investigation works have been completed. The Contractor to consider this and undertake further investigations deemed necessary.	3	1 12	MEDIUM	3 2	6 MEDI	JM 35.509	£291,929	£779,640	£2,338,920	31/12/2025
Strategic	C - Scope Change / Change	<u>C08</u>	18/07/2018	Design departures subject to NCC approval may not be granted. Note: Risk considers the deviations accepted through dialogue and the acceptability as part of the planning process.	Approvals not achieved so scheme cannot proceed. Designs require modification to address approval issues.	2 4	8 MED	Engage with NCC technical approval team and seek early advice on any potential departures. Confirm design freeze date with NCC, and seek NCC's early input to design decisions.	Possible departures/relaxations have been identified and key items have been reviewed/discussed with NCC. The RSA1 did not highlight any issues with the departures/relaxations.	2	3 6	MEDIUM	2 3	6 MEDI	JM 13.009	£264,805	£624,707	£1,249,414	30/09/2021
Strategic	C - Scope Change / Change	<u>C10</u>	02/07/2018	The DfT may make updates which affect traffic modelling.	The cost of re-modelling or re-working of models based on new data Programme delay whilst outputs are revised Effect on scheme benefits	2 3	6 MED	IM Early assessment of any DFT updates.	DFT are proposing changes to the Transport Assessment Guidance (TAG) green book in 2021, which take account of COVID-19, the revised fiscal and economic outlook, with focus on levelling-up and the government's commitment to net zero and the transport decarbonisation plan. DfT have advised that until these updates are definitive, scheme promoters should undertake a sensitivity testing, which is underway. As a result of the delay to the OBC submission, any further analysis required is to be discussed with DfT.	a rt e 3 3	3 9	MEDIUM	1 1	1 LOV	2.50%	£28,175	£74,637	£149,274	30/07/2021
Strategic	C - Scope Change / Change	<u>C13</u>	08/05/2019	The scope of the works to introduce cycle and footway provision is yet to be fixed in relation to the preferred route.	Additional scope and costs to provide Delays if stakeholder consultations lead to changes	3 3	9 MED	Carry out further investigation to determine existing trails, links and PROW, and understand desire line. Liaise with NCC and local stakeholders to gauge their views on measures being proposed.	Extent of walking and cycling provision now identified within the sustainable transpor strategy, which has been approved by project board and is being reviewed by DfT. LTI 1/20 guidance published in July 2020 may require more onerous design requirements than previously assumed for the STS measures.	N 2 2	2 4	LOW	2 2	4 LOV	/ 13.009	6 £51,871	£103,741	£207,482	31/10/2021
Strategic	C - Scope Change / Change	<u>C15</u>	12/08/2020	Changes to technical standards and guidance on which the design/assessment of the scheme are based.	Design changes lead to programme delay. Cost increases for additional/improved provisions. Challenge to funding application if compliance cannot be demonstrated.	2 3	6 MED	Assess any changes in guidance and incorporate into the emerging proposals	The governments cycling and walking plan for England policy document and updated guidance has recently been released. The project team are assessing any implications, although the focus is on urban environments.	. 2	1 2	LOW	2 1	2 LOV	/ 13.009	£63,700	£127,400	£254,801	24/06/2022

Application of Exception Test will be required to justify that location in flood zones provides wider sustainability benefit that outweighs flood risk and does not increase flood risk else where. Sustainability benefits of scheme to be confirmed by planning team. Impact on flood risk to be assessed in the FRA.	1 4	4 LOW	Continue to show how flood risk has been considered in the design and next stages of work, using evidence base information.	Flood risk considered within options appraisal. Flood risk continues to be considered and assessed during the OBC stage. Flood risk will be further investigated once the model is updated to a 1D-2D model in close consultation with the EA.	1 4	4 LOW	1 1	1 LOW	2.50%		£22,913	£45,826	31/10/2021
Strategic	F - Environmental	<u>F34</u>	06/08/2019 The project may incur costs due to the lack of a design freeze early enough in advance of work on the OBC, Scoping Report and the ES.	The risk could be a delay in programme and deliverables due to redoing of environmental assessment work. Abortive work if it changed halfway through the environmental assessment work for all stages, Continuous request for changes to completed designs		16 MEDIUM	Agree a definition and deadlines for design freezes of the route with all members of the team (Highways, environment etc) and with the client so it is clear what design everyone is working to. A new version of the design should not be used by any member of the team until next design freeze even if it is being updated by design team in between. To agree scope of allowable design changes and design freeze dates for design and build Contractor to comply with, and allocate clear responsibility for planning and EIA deliverables between WSP and Contractor as early as possible.	Current proposal is to base main ES on successful Tender Design. General Requirements contract document outlines expectations of tender design/response in relation to EIA.	3 2	6 MEDIUM	3 2	6 MEDIUN	35.50%	£290,655	£841,000	£1,468,467	31/10/2021
Strategic	F - Environmental	<u>F35</u>	Additional wildlife structures become required further to the new or additional information becoming available from surveys (i.e. bats and wildlife underpasses, or additional species being identified that require additional wildlife structures).	The cost associated with designing and implementing the structures Cost associated with addressing the highways alignment issues raised by the introduction of the new structures. Particularly the road profile which impacts on the land take.	3 4	12 MEDIUM	Allow a risk amount in the cost estimates to cover the additional cost of providing the underpass. Maintain wildlife bridge near the viaduct, even if it may not be required, as if it is not required but other wildlife structures become necessary this may balance the cost. Engagement between ecology team and design teams to identify as early as possible any potential additional wildlife structures needed. Use bat data from static detectors to evaluate requirement of bat structures	Three green bridges (GB1, GB2 and GB4) and one wildlife underpass (CU1) included in the forecast (tendered Price). Data from future surveys to be assessed against proposals as soon as it becomes available. Refer to E08 and C01 regarding number of structures and design development of green bridges.		6 MEDIUM	2 3	6 MEDIUN	13.00%	£224,886	£449,771	£702,899	31/10/2021
Strategic	F - Environmental	<u>F37</u>	The project red line boundary may increase due to ecology mitigation or the release of further requirements for constructability.	Programme delays to reach agreement with landowns/CPO additional land Cost and programme implications of increasing the project red line.	4 4	16 MEDIUM	Confirm 'potential' compound areas in procurement process. Ensure the worst case scenario is captured and Ecology and other teams have input	Ecology team have provided extensive feedback on the proposed 'Extent of Works' drawing based on current survey findings. Extent of works proposed to be a worst case scenario. Ecology surveys continuing in 2021, and outputs will be fed back to design team where applicable. Inclusion of biodiversity net gain areas and implications for other environmental assessments to be resolved. The current extent of works / RLB is generous writ temporary works and the contract documentation strongly discourages the bidders from proposing any extension of the RLB. Wrt mitigation areas for ecology (habitat creation only for species or BNG) it is being proposed to exclude any additional or 'off-site' areas from the scope of full EIA - which de-risks this item to some extent.		12 MEDIUM	2 1	2 LOW	13.00%	£36,998	£92,495	£184,990	03/02/2022
Strategic	F - Environmental	F38	Large amount of badger activity identified within northern woodlands (November 2019). Main sett location provided by NCC but no further details as access denied. Impacts to a main badger sett expected and therefore mitigation could involve creation of artificial sett. This will have to be located within the same territory as the existing sett, not within a neighbouring territory. Badger bait marking surveys therefore proposed.	Cost and programme and design implications.	4 3	12 MEDIUM	Proposal for badger bait marking surveys in these woodlands. This will allow for the ecology team to map badger territories and identify a potential location for an artificial badger sett.	Badger bait marking surveys undertaken to help inform assessment and location of replacement sett.	1 1	1 LOW	1 1	1 LOW	2.50%				01/06/2021
Strategic	F - Environmental	<u>F39</u>	03/12/2019 The exact areas required for biodiversity net gain (BNG) delivery is unknown at this stage.	Sufficient off-site land not available or secured. Increased land costs Programme delay for land negotiations and challenge at inquiry	4 4	16 MEDIUM	High level BNG assessment being undertaken based on available survey data and aerial imagery. Update once the BNG assessment is complete following confirmation of RLB and subsequent habitat survey updates.	Surveys completed of habitat within the route corridor but not beyond this. A high level map of potential BNG opportunities has been drawn up and engagement with landowners has commenced.	4 2	8 MEDIUM	4 2	8 MEDIUN	65.50%	£440,488	£880,975	£1,761,950	01/07/2021
Strategic	F - Environmental	<u>F40</u>	The planning application is "called in" by the Secretary of State for a 02/12/2019 decision. This is done for particularly controversial or technically challenging planning applications, and is a possibility for NWL.	Programme delay and cost increase for scheme development	4 4	16 MEDIUM	Allow for public inquiry in scheme programme and budget	Programme includes for a public inquiry.	4 2	8 MEDIUM	4 1	4 LOW	65.50%				30/03/2022
Strategic	F - Environmental	<u>F42</u>	02/12/2019 The planning application takes longer than 24 weeks to determine.	1. Programme delay	4 4	16 MEDIUM	Early engagement with LPA ensure sufficient resource available for determination.	Regular meetings with the LPA being held. Determination programme agreed with the LPA and 24 weeks included for determination in the project programme.	4 3	12 MEDIUM	2 1	2 LOW	13.00%	£29,620	£59,240	£118,480	30/03/2022
Strategic	F - Environmental	<u>F43</u>	The planning application is viewed by NCC (acting as the Local Planning Authority) as being 'contrary to the development plan'.	This would make getting planning permission more difficult. The Scheme would have to be justified based on 'material considerations', which is a higher bar than getting planning permission for a scheme that is in accordance with the development plan. Also increase the risk that the Secretaty of State calls the application in.	4 4	16 MEDIUM	Early engagement with the LPA. Ultimately accordance with the development plan is a mattter of judgement, and the planning statement be used to seek NCC's feedback on the approach that has been taken to the issue.	Discussions already ongoing with the LPA. Will coninue up to submission of the application.	3 4	12 MEDIUM	3 3	9 MEDIUN	35.50%	£126,571	£253,142	£506,284	30/03/2022
Strategic	F - Environmental	<u>F44</u>	Ecology and environment survey data becoming 'out of date' in relation to the planning application date. This is dependant upon the type of flora/fauna and associated habitat.	3. Design changes as a result of further information	3 4	12 MEDIUM	Plan re-surveying in case of programme slippage.	Surveys commenced in the winter of 2018 and will continute into 2021. Discussions ongoing with Natural England regarding the shelf life of surveys. Wintering birds are being re-surveyd in winter 2020/2021.	3 4	12 MEDIUM	2 1	2 LOW	13.00%	£49,739	£62,120	£124,240	03/02/2022
Strategic	F - Environmental	<u>F47</u>	12/08/2020 Objectors disrupt environmental surveys	Incomplete surveys and hence assessments may not be suitable for submission to the determining authority Delay to programme while surveys are rescheduled Increase in survey costs Impact on staff physical and mental wellbeing	4 4	16 MEDIUM	Monitor social media and assess whether disruption to surveys is likley. If disruption is likley, take additional measures such as increasing staff numbers, informing the police and other security measures	The bat radio-tracking surveys on 25 July 2020 were disrupted by protestors. The survey was cancelled as the risk to staff and bat welfare was considered too great. Additional bat surveys are being undertaken this season and potential protestor action is being considered during the survey preparation.	4 4	16 MEDIUM	3 1	3 LOW	35.50%	£135,826	£126,571	£253,142	03/02/2022
Strategic	F - Environmental	F48	08/09/2020 08/09/	Implications for dialogue with statutory and non statutory consultees. Possible confusion over differnet reusits and approaches to the management of ecological features	3 3	9 MEDIUM	Regular dialogue with HE Sweco Ecologist and NCC Ecologist to understand A47 emerging ecology results and approaches to mitigation.	Ongoing liaison with HE team. Both projects are continuiing with surveys and mitigation proposals	3 3	9 MEDIUM	1 3	3 LOW	2.50%				03/02/2022
Strategic	F - Environmental	<u>F49</u>	09/10/2020 Late receipt of data or feedback from stakeholders relating to EIA/ES.	Delay to submission of the planning application Costs associated with updating assessments and planning documents Challenge to submission based on new evidence	3 4	12 MEDIUM	Bring forward surveys as much as possible. Ensure comprehensive early engagement with stakeholdrs and the public to minimise unexpected late changes.	Surveys and engagement with key stakeholders ongoing. Currently scoping the pre- application public consultation	3 4	12 MEDIUM	2 1	2 LOW	13.00%	£49,739	£46,350	£92,700	03/02/2022

Operational	H - Flooding	<u>H01</u>	18/06/2018	River or ground water levels may rise leading to flooding during construction (weather). Note, this risk considers the effect of flooding on construction activities and the liability for the associated costs should a flooding event occur.	Costs to the project for enhanced flood mitigation Delays while mitigations are enacted Cost and time delay if flooding occurs while in construction	3 3	9 MED	Programme to include sufficient contingency, consider potential protection/interventions and minimise scheme footprint in flood plain. Requirement for contractors to sign up to the flood warning service.	Works during construction are being included as part of the FRA and maximum levels to be discussed with the EA.	3	3 9	MEDIUN	1 3 :	. 6 M	EDIUM	35.50%	£160,538	£673,839	£971,217	30/06/2023
Strategic	H - Flooding	<u>H02</u>	18/06/2018	Flood level design to FZ2 assumptions may change once detailed flood modelling is carried out - this may change the extents of viaduct required.	This may change the extent of the required viaduct. Increased design and construction costs, Impact on Programme	3 3	9 MED	Review flood levels on receipt of flood modelling from EA (35years+CC and 65 years+CC sensitivity test) versus assumed FZ2 levels used in current design.	Flood data received from EA and will be used in design. Unlikely to impact model due to extensive gauge records for the River Wensum	3	3 9	MEDIUN	1 1	3	LOW	2.50%	£106,910	£150,131	£300,261	03/02/2022
Strategic	H - Flooding	<u>H03</u>	25/01/2019	Infiltration and groundwater test results may indicate that discharge via infiltration is not viable.	There will be a change to design that requires discharge to watercourses, with subsequent pollution risks to Wensum. It will change the design for the drainage basins	3 4	12 MED	Tests to be undertaken at an early stage to mitigate impact. A sufficient amount of tests to be undertaken. Alternative discharge options to be explored as early as possible.	Infiltration tests are included within preliminary GI and infiltration is viable at all locations proposed based on GI information available at time. No discharge to Wensum proposed. Further infiltration teting will be required	2	2 4	LOW	2 :	. 4	LOW	13.00%				31/08/2021
Strategic	H - Flooding	<u>H04</u>	25/01/2019	The EA and NE may raise concerns with the proposed discharge options of the project.	This will result in a change to design that requires additional treatment to be installed. Potential requirement for additional land take may be required.	2 4	8 MED	Early engagement with the EA. Summary of strategy to be sent to groundwater team at EA to review.	Meetings with EA held regularily and strategy agreed in principle	2	4 8	MEDIUN	1 1 :	1	LOW	2.50%		£40,360	£80,719	31/08/2021
Strategic	H - Flooding	<u>H05</u>	28/01/2019	Infiltration rates on site may be poorer than originally specified/determined resulting in larger infiltration lagoons and land take.	Larger land take required to support the infiltration lagoons Survey required of the additional land take	3 3	9 MED	Tests to be undertaken at an early stage to mitigate impact. A sufficient amount of tests to be undertaken.	Conservative infiltration rates have already been used to size lagoons from surrounding area. Infiltration tests are included within preliminary GI.	3	1 3	LOW	3 :	. 3	LOW	35.50%		£496,435	£992,871	31/08/2021
Strategic	H - Flooding	<u>H06</u>	29/01/2019	Delays getting approval of the hydraulic model by the EA. The EA's hydraulic models may not be not suitable to inform detailed assessment and the design of mitigation.	Cost associated with additional modelling required Programme implication associated with further modelling Gaining EA's approval for the updated model	3 3	9 MED	Early review of available model data. Consultation with EA. If issues noted during detailed assessment and design, raised as soon as possible and remedial actions discussed.	We are using an existing model held by the EA to reduce the risk of acceptance of a new 1D-2D model by the EA. We will undertake a review and prepare a method statement on model updates to issue to the EA to further manage this risk.	2	3 6	MEDIUN	1 2 :	. 2	LOW	13.00%		£70,411	£140,822	31/10/2021
Operational	H - Flooding	<u>H07</u>	29/01/2019	The EA may require additional modelling of the temporary works solutions around the watercourse crossing.	Cost impact of additional modelling Programme impact of additional modelling	3 3	9 MED	Early contractor engagement to understand temporary works requirements. Consultation with EA.	The EA confirmed that flood compensation will be required during the construction phase. Construction methodology advice being sought to understand potential temporary works solutions.	3	1 3	LOW	3	. 3	LOW	35.50%				31/10/2021
Strategic	H - Flooding	<u>H11</u>	08/07/2019	There are low points within cuttings along the alignment – this means that the infiltration lagoons need to be lower than the lowest point. Since the lagoons are lowered this is defined as 'deep infiltration' in the eyes of NCC LLFA and is not a preferred form of discharge (there may also be issues with groundwater at the deeper depths).	Solution will not be accepted by the LLFA requiring design changes Increased costs/delivery programme of alternative solutions	3 3	9 MED	Liaise with Highways to try and reduce impact of low points within cuttings once route has been selected Engage and liaise with LLFA with regards to their policy memo.	Meetings with LLFA held regularily and strategy agreed in principle	3	3 9	MEDIUN	1 1 :	1	LOW	2.50%				03/02/2022
Strategic	H - Flooding	<u>H12</u>	01/11/2019	Changes to the alignment and accommodation of ecology and side road structures may necessitate the need for pumped drainage. This will require a power supply to be procured from the nearest point of connection.		2 3	6 MED	Liaise with Highways designers to try and reduce likelihood of pumped drainage.	Current design does not require pumped drainage. To be assessed against any alignment changes.	2	3 6	MEDIUN	1 1 :	. 1	LOW	2.50%				31/08/2021
Strategic	H - Flooding	<u>H13</u>	09/01/2020	The amount of floodplain compensation required to compensate for the viaduct piers may extend the Scheme red line boundary and land requirements. This may arise following 1D-2D flood modelling and confirmation of the number and location of viaduct piers and within the flood plain.	1. Affect the extent of other assessments (e.g. ecology surveys) required, and subsequently the EIA and planning application programme	2 4	8 MED	Engage with contractor to determine likely viaduct pier and abutment design at earliest opportunity AND/OR utilise worse case reference structures design.	Cross discipine liason to co-ordinate compensation strategies, new compensation locations have been identified, which may result in changes to the existing red line boundary but will ensure the areas are more robust to accomodate changes in the design for increased floodplain compensation requirements.	3	1 3	Low	3	. 3	LOW	35.50%				31/10/2021
Strategic	F - Environmental	<u>H15</u>	28/10/2020	The Environment Agency are undertaking restoration measures along the River Wensum. The scope and programme for this work is unclear.	Inaccurate baseline for flood modelling and geomorphology assessment. Amendments to ES if further information becomes available at a later date, potential porgramme delays.	2 3	6 MED	Ongoing consultation and as the design progresses will know more. More updates when data is available.	Initial meeting on the Restoration Strategy. Further details are being provided by EA which will be included in the futur baseline.	2	3 6	MEDIUN	1 1 :	1	LOW	2.50%				31/10/2021
Strategic	J - Resources	<u>J01</u>	18/06/2018	There may be a change to employer/ designer team members.	Lack of continuity of project knowledge within the NCC and WSP teams	3 2	6 MED	Succession planning identified within action list and team hand over at key milestones.	Action list with succession planning initiated. Project Team roles defined and team structure in place.	3	1 3	LOW	3	3	LOW	35.50%		£77,123	£154,245	31/12/2025
Strategic	J - Resources	<u>J02</u>	18/06/2018	There may be insufficient resource to maintain current programme. Note, Risk P16 considers the wider issue in respect of the Contractor's resources.	Potential to delay the project (increasing cost or damaging reputation) Errors which impact quality of work and undermine the statutory processes.	3 3	9 MED	UM Ensure adequate budgets and resources in place to cover required input.	Team resources identified and deployed for forecasted work. Discussions ongoing around the resource required to include the NWL in the GNLP and LTP	3	1 3	LOW	3	3	LOW	35.50%	£129,845	£413,935	£620,902	31/03/2025

Strategic	L - Approvals	L04	02/07/2018	The project may not give sufficient consideration to planning policy.	The proposed scheme is not compliant with national networks / local planning policy resulting in it not being granted.	2 4	8 MED	Review of policy at each stage and updates, EIA scoping will assist with identifying relevant policies to consider but local plan emerging in parallel.	OBC aligned with local policy and REB priorities. Awaiting Local Plan 2036 and LTP update	2	4 8	MEDIUM	1 2 3	6 M	EDIUM	13.00%	£12,148	£24,296	£36,443	16/05/2023
Strategic	L - Approvals	<u>L05</u>	02/07/2018	The scheme submitted for consultation or examination may not be sufficiently developed in terms of design.	Greater support required at the examination as more questions will be asked by the examining authority Additional mitigation/planning conditions /s106 agreements may be required Increased exposure to a legal challenge (A05)	3 4	12 MED	Robust design process, peer review and benchmarking, EIA, liaising closely with HE r. A47 junction, additional stakeholder and local access public consultation held in Summer 2020. Pre-application consultation will be undertaken prior to planning application submission.	Design progressing to planning programme. Main risk impacts during construction- hence ECI from contractor planned in programme. Following WebTAG staged assessment protocols and DMRB guidance on level of detail at each project stage. Following TCPA/LPA requirements for planning application.	3	3 9	MEDIUM	1 2 2	4	LOW	13.00%	£31,492	£62,984	£125,968	06/09/2022
Strategic	L - Approvals	L07	02/07/2018	Changes to designations (e.g. ecology within study area).	Resulting in an insufficient assessment and a subsequent challenge to the scheme.	4 3	12 MED	Work with landowners and their consultants, site surveys for ecology ground truthin and liaison with NCC ecology	Maintain dialogue with Natural England and NCC and monitor any consultations to change designations.	2	1 2	LOW	1 1	1	LOW	2.50%	£1,168	£1,752	£2,336	01/10/2021
Strategic	L - Approvals	L09	02/07/2018	Land interests do not return requested information in time.	Vital interests are therefore excluded and not notified.	2 3	6 MED	Early engagement with affected parties	Information gathering exercise being undertaken. NPS managing landowner engagement.	1	2 2	LOW	1 2	2	LOW	2.50%	£24,655	£45,597	£136,791	31/08/2021
Strategic	M - Planning / DCO	М03	02/07/2018	Local Plan for 2036 is emerging - key developments in study area not confirmed.	Future model forecast results may change - may affect scheme economics	3 4	12 MED	Constrained to totals for HH and jobs to Local Plan extent of need for 2036 emerging LP and use tempro to assign spatial distribution. Agree approach with NCC planning officers.		3	3 9	MEDIUM	1 2 2	4	LOW	13.00%	£12,148	£24,296	£36,443	03/02/2022
Strategic	M - Planning / DCO	M04	18/06/2018	DFT may not accept traffic modelling used for assessment, economic appraisal or are not forth-coming with technical reviews.	Inability to support the findings Extra modelling work Delay associated with additional modelling	3 3	9 MED	Follow webTAG guidance. Produce local model validation report at the OBC stage. JM 2. Engage with DfT throughout traffic modelling development.	Engagment with DfT ongoing. Modelling reports submitted to DfT for review in advance of the OBC submission and comments being incorporated into the final documents.	2	3 6	MEDIUM	1 2 2	4	LOW	13.00%	£12,148	£24,296	£36,443	31/07/2021
Strategic	M - Planning / DCO	M05	02/07/2018	The traffic modelling could show the scheme does not have sufficient benefits for a business case resulting from the updated traffic model, HE changes on the A47 or alternative developments emerge as part of the Local Plan 2036.	I. Insufficient BCR to progress scheme. Project costs (including mitigation) may outweigh benefits Model forecasts change	3 5	15 MED	1. Update traffic modelling and undertake scenario testing. 2. Consider mitigation costs. 3. Regular engagement with Local Plan team. 4. Engagement with HE as schemes develop so they are coordinated.	The 2019 base year model has been successfully calibrated and validated. Sensitivity assessment re COVID-19 impacts etc has been undertaken and will be reported on in the Traffic Forecasting Report and the Economic Assessment Report. Updated Benefit to Cost Ratio (BCR) to be produced for all different growth scenarios, based on the latest cost estimate. As a result of the delay to the OBC submission, any further analysis required is to be discussed with DfT.	3	4 12	MEDIUM	1 1 1	1	LOW	2.50%	£7,008	£9,344	£11,681	31/07/2021
Strategic	M - Planning / DCO	M07	03/03/2021	NCC are unable to enter into sufficient land agreements for the off- site environmental mitigation	Programme delays while agreements are finalised Increases in costs if uptake is low Increased risk of unsuccessful CPO if off-site land is included Changes to the scheme boundary	3 4	12 MED	Early discussion with landowners Develop a comprehensive agreement with legal team/LPA Determine the minimum requirement for planning purposes	Discussion with landowners have commenced and a skeleton agreement is being developed	3	3 9	MEDIUM	1 1 2	2	LOW	2.50%				03/02/2022
Operational	N - Procurement	<u>N01</u>	18/06/2018	The project may encounter unexploded ordinance while conducting surveys or construction.	Removal costs which include further investigations and specialist resource for the removal Stand down while the site is investigated	2 3	6 MED	Desk study to review historic use of land, review county archive bomb map etc, geophysics surveys and scans prior to construction	Desk study has been completed. No major risks identified.	3	1 3	LOW	3 1	3	LOW	35.50%	£185,313	£370,627	£741,254	31/07/2021
Strategic	N - Procurement	N02	18/06/2018	Potential effects on the Source Protection Zone (SPZ).	May require redesign of drainage solution	3 4	12 MED	Apply lessons learnt from NDR & Postwick Hub.	HEWRAT to be completed as part of ES. ES will consider this broadly based on available design info, but detailed assessment wrt to piling risk is proposed to be deferred to the Contractor as a planning condition during Stage One.	2	4 8	MEDIUM	1 2 2	4	LOW	13.00%				31/10/2021
Operational	N - Procurement	<u>N04</u>	29/01/2019	The project may encounter the presence of a layer of not previously identified soft and/or organic soil.	Necessity to carry out ground improvement and a need for strengthened construction platform results in cost escalation.	3 3	9 MED	Targeted ground investigation to allow advance notice and appropriate design.	Preliminary ground investigation has been completed, with further GI planned for Stage One	1	1 1	LOW	2 1	2	LOW	13.00%				31/01/2022
Operational	N - Procurement	<u>N05</u>	29/01/2019	The project may encounter the presence of solution features in Chall (e.g. sinkholes and geotech issues).	k Necessity to carry out grouting of solution features results in cost escalation	3 3	9 MED	Targeted ground investigation may not encounter this. Thus allowance should be provided for this to be addressed by the Contractor during the construction	Preliminary ground investigation has been completed on site. Contract documents cover this eventuality.	3	1 3	LOW	3 1	3	LOW	35.50%				31/01/2022
Operational	N - Procurement	<u>N06</u>	29/11/2019	As a result of the alignment changes and access difficulties the GI may not cover the exact locations of the proposed structures and earthworks.	Delay to programme while addition GI is undertaken Cost increase/programme increases if poorer round conditions are encountered in areas that have not be assessed	3 3	9 MED	Main GI be carried out by the Contractor on the basis of agreed frozen design	Preliminary ground investigation has been completed on site. Contract documents cover this eventuality.	1	1 1	LOW	1 1	1	LOW	2.50%				31/01/2022
Operational	P - Construction	<u>P01</u>	18/06/2018	Protestors to the project may physically stop work.	Delays to project while the police remove protestors The project needs to enhance site security	3 3	9 MED	Public consultation to identify objection risk, work with key stakeholders and landowners and keep informed of scheme benefits. Seek solution which minimises environmental effects, EIA, Stakeholder management plan, local liaison group	Two rounds of non-statutory consultation undertaken and regular LLG and landowner meetings being held. Also engaging with potential objectors / demonstrators. Surveys have been disrupted and this may translate into disruption during the works.		1 3	LOW	3 1	3	LOW	35.50%	£267,215	£428,985	£857,970	31/01/2022
Operational	P - Construction	<u>P03</u>	02/07/2018	Supplier may underperform.	Delays Renegotiation Increased cost to meet conditions	3 4	12 MED	Use appropriate contract terms and supervision. A suitably experience Project Manager with prior experience of project managing major project under the NEC will drive performance.	a Contract documents designed to limit risk and exposure to NCC.	3	1 3	LOW	3 1	3	LOW	35.50%	£162,508	£285,610	£531,815	31/01/2022
