

PROPOSED WORKS

- Carriageway widening
- Estimated area of allotment land permanently required for scheme.
- Works area - to be reinstated after construction.
- Trees to be removed.
- Existing trees to be retained and protected during works, in accordance with tree protection drawing and BS 5837:2012

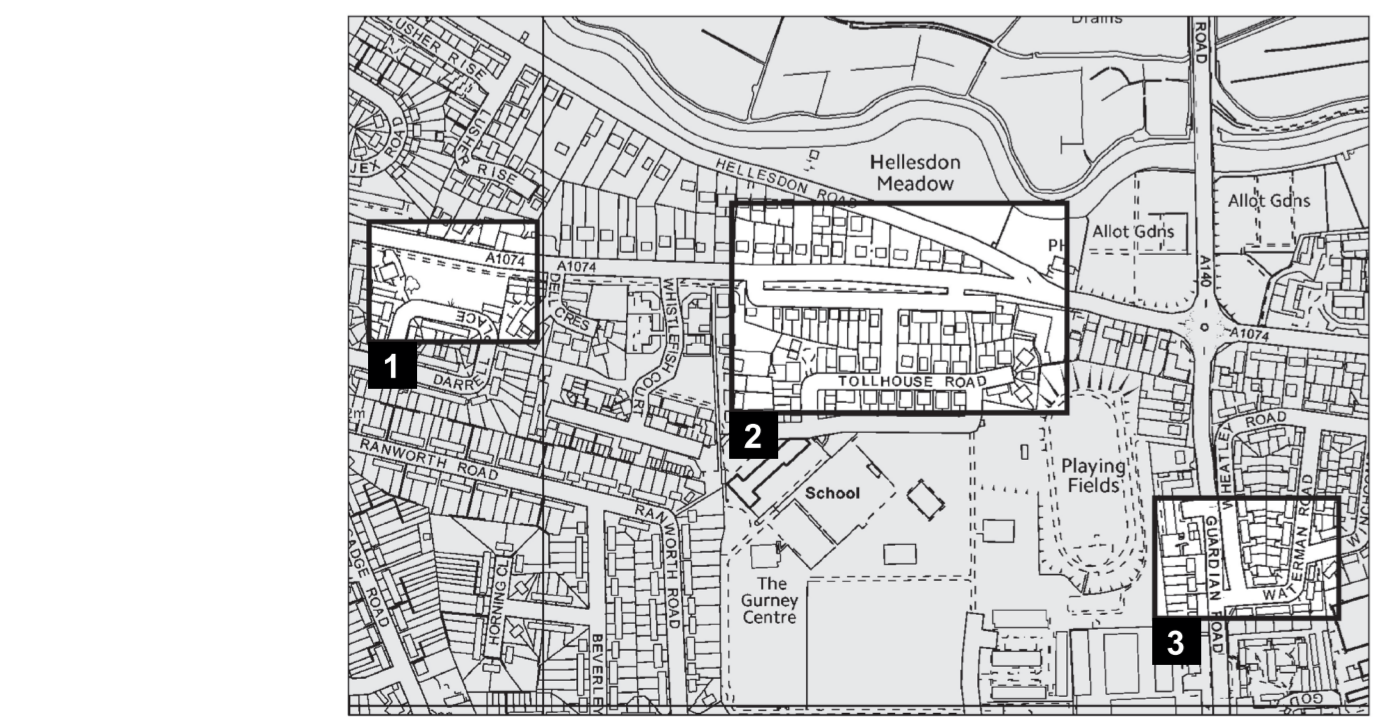

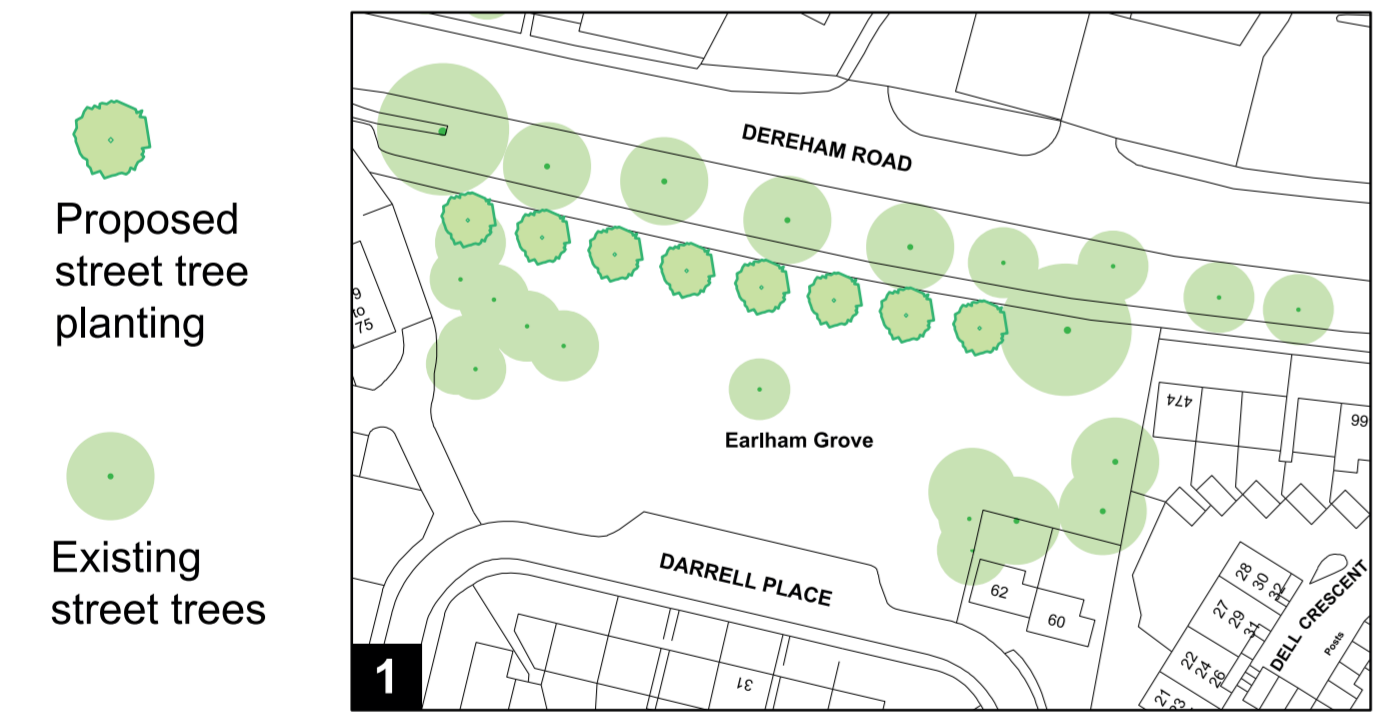

PRIMARY MITIGATION

- New secure fence treatment and native hedgerow to allotment boundaries.
- Replanting to banks with specimen trees and ecologically diverse flowering and fruiting shrub and tree mix.
- Street tree planting.

SECONDARY MITIGATION

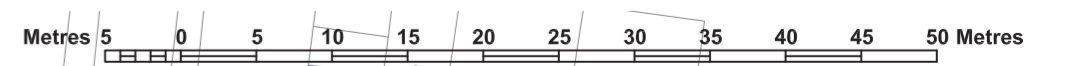

- Trees on roundabout (subject to underground utilities and visibility requirements)

PRELIMINARY STREET TREE PLANTING PLAN - subject to design development and detail

RECOMMENDATIONS FOR CONSTRUCTION MANAGEMENT

- Arboricultural Impact Assessment (AIA) and Arboricultural Method Statement (AMS) to be prepared for project, to inform replanting requirements.
- Site monitoring to be undertaken for ecology and arboriculture.
- Works plan and site management to include adequate fencing and hoarding to protect allotments from damage and allow continued use during works.
