University Crescent, Gorleston – Pavement Reconstruction

Essential reconstruction of a section of worn-out pavement along University Crescent is currently programmed to start from 15 April 2024 and will take up to 7 weeks to complete. The existing damaged surface will be removed and replaced with a new level surface, and broken kerbs will be replaced where needed.

To ensure there is sufficient access for this work, it will be necessary to temporarily suspend on-street parking through University Crescent (odd numbers 5 to 23) for the duration of the works.

Access to properties will be maintained throughout the works duration, however there may be some brief periods where vehicle access to an individual property is restricted while work takes place in front of existing driveways, but residents will be notified in advance by the works' contractor in these instances, where possible.

On completion of the work, the new pavement surface should improve ease of access for all users and reduce maintenance costs.

The County Council thanks people for their patience while this essential reconstruction work is carried out.

The work which will cost £75,000 will be carried out by Norfolk County Council's Community and Environmental Services Department and their contractors.
