Prince of Wales Road Road Rejuvenation works

The C850 Prince of Wales Road will be closed which includes a suspension of parking on 9th June, between the hours of 06:00 and 12:00. It is intended to apply a road rejuvenator which is sprayed onto the road surface and requires time to soak into the top layer.

Through this early intervention approach the road surface will last a number of years longer than without. Norfolk is following a regime of preserving our asphalt surfaces which is both good for the environment and good value for money.

A fully signed diversion route will be in operation for the duration of the works. The County Council thanks people for their patience while this work is carried out.

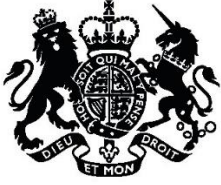

The works which will cost £26,363 will be carried out by Norfolk County Council's Infrastructure Department and their contractors.

For further information

John Hunter, Asset Engineer, 0344 800 8020.

This is an ongoing treatment used on parts of Norfolk's classified Network to prevent the surface layer deteriorating. The rejuvenator has a very low carbon footprint and is used to elongate the life of the very expensive surface asphalt layer.

Up-to-date information about roadworks in Norfolk is available on the County Council website at www.norfolk.gov.uk/roadworks
